## **IRIS TERMS**

### **As Used in This Catalog**

**AMOENA:** White or lightly tinted standards and colored falls, which may be blue, purple, yellow or pink.

**BEARD:** The conspicuous hairs borne on the center of the haft of the falls in bearded Iris.

**BITONE:** Two tones of the same color. Ordinarily the falls are darker than the standards.

**BLEND:** A combination or mixture of two or more colors in the same parts of a flower, one color usually yellow.

**HAFT:** The narrow constricted part of the petals near the center of the Iris flower.

**ONCOBRED:** A hybrid of oncocyclus and tall bearded parentage, showing resemblances to both parents.

**PLICATA:** Stitched or stippled or dotted margins of color on light backgrounds. Backgrounds range in color from white through creams to dark yellow.

**SELF:** A flower with standards and falls of the same color.

**SUBSTANCE:** Thickness of the petals.

**TEXTURE:** Sheen or finish of the petals.

**VARIEGATA:** An Iris with standards of any shade of yellow (cream, buff, yellow, orange, bronze, etc.) and the falls of a darker shade of tones of brown, purple or red.

## FORWARD—PLEASE READ CAREFULLY

It is Iris time once again. With this, our fifth catalog, we wish to greet our many friends and customers and those of you whom we hope to serve in the coming years. The Iris is truly the "Queen of the flower garden, a rainbow come to earth." It is with both pride and pleasure that we offer you many new additions to our list.

Visitors to the gardens are more than welcome. Our blooming season is one of the latest, because we are located in the mountains, near the Canadian border. Peak bloom is usually reached the second week in June. You will find our gardens about thirty-six miles North of Colville, between Deep Lake and Cedar Lake. Come if you can and see six acres in bloom. Iris collecting is our hobby. We are growing many of the older Iris here and many of the very latest Iris that are not listed in our catalog. In all, we have collected about 3,000 varieties.

The Iris is a hardy plant and can stand more neglect than most flowers. But it does respond to good care. The ideal location for Iris is a sunny, well-drained position. They require at least a half day of full sun and resent continued "wet feet." Iris rhizomes will grow after being out of the ground for long periods of time. The green fans may wither away and the roots dry up but the bulk is capable of growing replacements. In fact, if an Iris is transplanted directly from one location to another, they appear to sit and sulk for quite a while before beginning growth. But if they are out of the ground for several days or longer, they appreciate their new location and are conditioned to start growth immediately. Because the embryo bloom stalk for next year's bloom is formed in the Iris rhizome about a month after blooming season is over, the later in the summer that an Iris is transplanted the more likely it is to bloom the first year.

All Iris rhizomes are not alike, some are naturally large while others are very small. The size of the rhizome has nothing to do with the size of the blossoms. Wm. Mohr's bulb is no larger than the end of a woman's thumb, yet it has very large flowers.

WE PAY THE POSTAGE! Postal rates were raised again the first of the year, but we still plan on paying all the postage. We want to make these beautiful Iris available, without penalty, to those who have limited space or limited money to spend on flowers. We have been asked to cooperate with other gardens by placing a thirty-five cent handling charge on all orders. We still accept even the smallest orders but we do appreciate the way neighbors have been combining their orders to help us with this postage problem.

OUR DIGGING AND SHIPPING SEASON WILL START THE 20TH

OF JULY AND will continue until the 15th of September. Please do not ask for or expect earlier shipment, because our later blooming season does not allow the Iris rhizomes to mature earlier. As far as possible, orders are filled in the order in which we receive them, unless a later date is specified. Hundreds of orders come in every week during March, April, May, June and July and it is physically impossible to fill them all the first week of the digging season. To insure as early a shipment as possible, make your selections now and place your order early.

We ship only quality rhizomes, freshly dug, clean, labeled and well packed. They are guaranteed to be true to name. Because growing conditions in your locality are beyond our control, we cannot replace any Iris lost due to winter kill. During the last four years we have shipped Iris to all 48 states and to Canada and Alaska. Our gardens are state inspected. We are a member of the American Iris Society and the British Iris Society. We like to do business with flower lovers and have found them to be a reasonable and appreciative group of people.

**BONUS IRIS.** We like to be generous with extra Iris as gifts. If your order is under \$5 we will select your bonus Iris for you. On orders between \$5 and \$10, you may choose 10% of the total in free Iris. On orders of \$10 or over you may select 15% of the total in free Iris. This is not a cash discount, but a bonus of free Iris

If you are a beginner in Iris collecting and would like a lot of varieties for your money, send us \$3.50 and we will choose 15, all different, large flowered, named Iris for you. This collection will be labeled and contain a wide range of colors but cannot be shipped before the end of August, when we can determine what varieties we have in surplus. If you are an Iris collector and are interested in the older, hard-to-find varieties of bearded Iris that are seldom listed in catalogs, you will find a list of them in the back of this catalog. **WE DO NOT ISSUE A WHOLESALE LIST.**

## IRIS ORIGINATIONS OF MELVINA SUITER

We are happy to be able to list in our catalog, again this year, some of the newer Iris from Melvina Suiter of Caldwell, Idaho. Mrs. Suiter is a hybridizer who for many years has been going quietly about the work of creating beautiful new introductions and seedlings that are outstanding for their color or color combinations, for their ruffling, lacy edges, satin texture, height, heavy substance or a combination of several of these qualities. Some of the Suiter Iris that are slated for future introduction, that may be seen growing as guests in our gardens are: Amber Blush, Dorothy Patch, Fairgold, Kristina, Molka Polka, Mt. Borah, Rose Point and Tomeco.

Other originations of Mrs. Suiter's that we are growing to multiply stock but dare not list for fear the demand would be too terrific are: Apricot Flare, Cameo Portrait, Cute Tomato, Dusti-Pink, Gold Frills, Last Snow, Orange Frills, Pink Lassie, Prairie Moon, Sweet Alice Lee, and Thumb's Up. We are offering the following Suiter Iris this year, but some are in short supply so to avoid disappointment, place your order early. After the name of the Iris, we have listed the height, season of bloom and parentage for your convenience.

## LIST OF OLDER AND HARDER TO FIND IRIS

During the years, we have collected a great many of the older Iris, that are being dropped from other catalogs. They were the outstanding Iris of their day and we feel that their charm should not be lost to the world. We cannot maintain a large supply of each and every one of them because of the space and labor involved. But while they last, you may order any of the following for 50 cents each or 10 for \$4.50 or 20 for \$8.00 We would appreciate a list of second choices. After the names we have listed the year of introduction and the general color class.
